

ISO Module Improved Capacitance Manometer

Upgrade Part number: 853-021635-001E

esl 
service is solution

- Smaller dimensions
- Stainless steel sensor
- Improved accuracy
- Configurable connection
- Available in multiple configurations
- Improved maintenance access to ISO module

This is to inform ESL customers, that a new smaller solution for the Isotropic chamber baratron has been found and tested. This new manometer is a direct exchange for the obsolete original TYLAN General manometer. The ESL manometer creates more room for service and for opening the ISO chamber. No additional tubings or angles will be needed for installation. The adapter to the chamber and the electrical connection can be individually defined.

For a quotation, please provide your desired chamber flange and electrical connection wishes.

- **Model affected**
All Rainbow, TCP & Alliance systems using an Isotropic Etch chamber
- **Easy installation**
The manometer will be easily exchanged against the original Tylan product
- **Contents of the retrofit kit**
Capacitance Manometer
- **To receive further information or technical data, please contact us by mail or phone.**

© ESL Elektronik GmbH is a ISO 9001 qualified supplier for semiconductor and other hitech equipment. Our calibrations are traceable to NIST and are performed in a class 100 cleanroom. Please contact our office for technical assistance.
