

New Light Pen for all Lam Research Envision Tools

Upgrade part number: 685-098277-100E

esl 
service is solution

- Continuous supply
- Improved reliability
- Improved tool control
- Drop in installation
- Plug and Play design

The Lam Research light pen is now continuously available to control all Lam systems equipped with a CRT and an Envision software. This Light pen is fully compatible to the existing pens which are being phased out by Lam Research. This allows the user of the systems to continuously use a Light Pen than the weak and fragile track balls. No up-grade, mouse or track ball system need to be installed to continue to control the Envision software. The light pen comes with the correct plug for immediate plug and play use.

- **Model affected**
All LAM Research Systems using a CRT and light pen control
- **No additional modification needed**
- **Easy Installation**
Installation is easily made by just plugging in the new light pen into the jig at the tool front
- **Contents of the retrofit kit**
The Kit contains one light pen including cable and original plug
- **To receive further information or technical data, please contact us by mail or phone.**
