

# Lam Research Envision Touchscreen

Upgrade part number: 852-017500-002E

**esl**   
service is solution

- Improved uptime
- Improved machine control
- Improved brightness & contrast
- More exact than light pen or keyboard trackball
- Plug and Play design

A new LCD touch-screen is available for plug and play replacement of the CRT light pen system. The Touch-screen LCD display has a superior picture format, higher quality resolution and longer life time than the standard CRT units. The addition of the Touch screen allows easier and quicker control inputs, compared to the light pen and or mouse and track ball.

The pause time for the light pen to register the position of the cursor is greatly improved with a touch screen. It can be operated with a stylus or with a gloved finger. No software changes or additional programs are needed to install this system.

- **Model affected**  
All LAM Research systems with Envision Software
- **No additional power source needed**
- **Suitable for all screens with the part numbers 852-017500-001**
- **Installation**  
We recommend to have the first touch screen installed by ESL Elektronik. Please send us your complete operator interface assembly to retrofit.
- **Contents of the retrofit kit**  
The retrofit comes with the screen, all needed cables and frames. Operator Interface assembly has to be supplied from the customer
- **To receive further information or technical data, please contact us by mail or phone.**
