

Upgrade Side Panel GUI Monitor

Upgrade Part number: 3000426E

Replaces EOL Part number: 3000426

- Easy EOL part replacement
- Improved tool operation
- Improved accessibility
- Improved stability
- Full 3D tiltable

ESL has introduced a new touchscreen and keyboard modification for the Mattson RTP 2900 Front GUI panel. The original design has become obsolete and this new design allows the front panel at the side of the equipment to be used.

A new bracket allows the new Touch Screen to be easily fitted in the field.

An additional keyboard bracket can be added, to allow a better keyboard usage in combination with the touchscreen. ESL has produced multiple touchscreen designs to upgrade various tools and configurations.

We are flexible in our designs and can manufacture your individual design requests.

• Model affected

All graphical user interfaces on RTP systems
This includes RTP2800 and RTP2900.
Usable as Remote or Main GUI.

Note: This Upgrade only works on
Windows tools.

• Easy installation

The upgrade kit comes with all needed parts and is a direkt exchange. Installation procedure and drivers are included. A driver software must be installed to work with this new highly reliable USB Touchscreen

• Contents of the retrofit kit

One kit includes all needed cables, software, drivers and screen to equip one tool with this upgrade
