

New Light Pen for all Applied Materials tools

Upgrade part number: I120-90000E

esl 
service is solution

- Continuous supply
- Improved reliability
- Improved tool control
- Drop in installation
- Plug and Play design

To notify customers that an alternative optical light pen is immediately available supporting Applied Materials tools. This ESL light pen is fully compatible with the original light pen working with the existing Monitors and softwares. This allows the user of the systems to continuously use a Light Pen than the weak and fragile track balls. No up-grade, mouse or track ball system need to be installed to continue to control the software. The light pen comes with the correct plug for immediate plug and play use.

- **Model affected**
All Applied Materials Systems using a CRT and light pen control
- **No additional modification needed**
- **Easy Installation**
Installation is easily made by just plugging in the new light pen into the jig at the operator interface
- **Contents of the retrofit kit**
The Kit contains one light pen including cable and original plug
- **To receive further information or technical data, please contact us by mail or phone.**
