LAM Research Rainbow / TCP Training Classes

Operator, Basic, Advanced and Special

For a long time, ESL offers LAM Research Rainbow and TCP Training classes for Operators, Engineers and maintenance technicians. Our very experienced trainers give an individual theoretical and practical training. Various LAM Research tools are installed in our cleanrooms (Rainbow 4520; Rainbow 4420; TCP9600SE) for technical and mechanical interventions. Our Europe based training tools prevent high travel cost. Hotel expenses are included in the training price. Your engineers get whether german or english hands on techniques from experts.

Small training groups are preferred to fulfill your engineers wishes and questions. Customer specific classes can be arranged. No mixing – customer classes only. Training starts for 3 or more persons up to a maximum of 6 per class. Each trainee will receive a Training certificate after successful Training completion.

Models affected

All LAM Research Models up to TCP Rainbow 4400 series; Rainbow 4500 series; TCP series; AutoEtch

Suitable for all fab employees

Operators, engineers and maintenance personnel

Training includes

5 complete training days for a maximum of 6 engineers per class, accommodation, lunch and training manuals and certificate.

Advantages

European training location
English and German classes available
Fully facilitized training tools in cleanroom
Individual classes with special focus on customer demands
